Coroner Flynn examined a number of witnesses, and from the testimony it appeared that Coughin, when intexicated, attempted to get on ear No. 141 and was put off by the conductor, who stopped the car for that purpose. After electing Coughin the ear was again started. Coughin ran after it, and attempted to get on the front platform, but was prevented by the driver, Charles Egan. While thus engaged, Coughin was knecked down by the burses attached to ear No. 24, coming from the opposite direction, and, falling under the ear, was ran over. The jury censured Egan and the railroad company for allowing auch conduct on their line. Egan was held to ball by the Coroner in \$2,000.

RIVERHEAD.—An important suit was decided hast week at the Suffolk County Court. According to the special law passed in 1850, all roads not recorded, which have been used for public highways for twenty years preceding March 21, 1787, and which have been worsed and used as such for the last six years, shall be deemed public highways. This law was repealed in 1864, and Long Island came under the division of the general State law, which provides that all roads not recorded, which have been used for twenty years, shall be deemed public highways. The suit was instituted by the executors of E. S. Champion's estate against the Trustees at Greenport, the village claiming the right of highway over the property of the estate. The plaintiffs insisted that the road, not having been used for twenty years as a highway previous to 1797, had not become a public highway at the time of the repeal of the Long Island act, and that, in consequence, the road cannot become so by use until the expiration of twenty years from 1864. The Court sustime of the repeal of the Long Island act, and that, in consequence, the road cannot become so by use until the expiration of twenty years from 1864. The Court sustained this view. PRESENTERIAN CLERICAL ASSOCIATION - TREAT-MENT OF ROMAN CATHOLICS.

The weekly meeting of the Presbyterian Clerieal Association was held yesterday in the chapel of the Union Theological Seminary, Dr. Maclise in the chair. The large attendance showed the interest taken in the question, which was discussed for the third, and as it after ward proved, the last time, viz.; "The limits of Christian charity in our treatment of Roman Catholics." The dis-cussion was opened by the Rev. Mr. G. S. Chambers, who cussion was opened by the Rev. Mr. G. S. Chambers, who said that when the word charity is taken in its primary meaning of love there is no limit. We must love all men. In this way we can pray for Roman Catholics and work for their conversion. If by charity is meant communion, a different face is put upon the matter. There is a broad distinction between a Roman Catholic as a man and us religiously. As a man I can pray for him, love him, associate with him in business. But as a religiously I cannot hold fellowship with one who advocates very dancerous errors and regards me as a heretic. Romanists are not entitled to the same place in my affection and respect as members of my own church. direct and uncompromising hostility toward us in their tensis, practices, and designs. This position is based upon the Word of God. It is necessary for us to separate ourselves from all that is impure in doctrine or morals. There is no other course open to us than complete separation from this corrupt church. It is not a church of Christ. It is a church that has taught for doctrines the densions of men, and it is liable to all punishments pronounced against false teachers. No doubt members in the communion of that church can be saved; but there is an essential difference between the Roman Cathelia and Christian systems. Any system that degrades the mediaterial office of Jesus Christ, that reserves for mortal man the position of head of the Church that represents Curist as the pilable instrument of the Virgin Mary, that makes the Word of God virtually a closed volume to its millions of voluries, and rears itself as a great idol to which every worshiper must bring his conscience as an offering, we must refuse to acknowledge as a church of Christ.

Dr. Crosby, in continuing the discussion, said that as regards Christian charity, that can only be exercised between man and man, and has no limit. In that sense every Roman Catholic should be as near to us as any one structured to which we have no charity. We must, as true men, conduct ourselves in accordance with its regards to which we have sold convictions of its injurious falsity, truth demands that we should not identified the chart of the c

"Around the World" was the subject of a lecture last evening, in Association Hall, by the Rev. E. D. G. Prime, D. D., before the New-York Association for the Advancemet of Science and Art. The speaker stated that the time now required for a journey around the world was less than three, months, and that the entire journey may be accomplished by steam. The entire cost of a journey, occupying one year, is about \$2.00 in gold. As to the course, the speaker said, "Westward, with the star eftempire, must the traveler take his way or he will find himself in almost every country at the wrong time," The best time to leave San Francisco by the steamer is the lat of September. The lecture gave a very interesting account of his tour, presenting many valuable statistical facts in regard to the countries through which he passed, and relating many interesting incidents of his personal experience.

The Rev. Mr. Lampe thought that all who are outside of the Christian Church should be treated alike. Some have said that they would affiliate with the Catholics and show them kindness in the hope of winning them to the truth. They would smile on what they deemed in their hearts false and corrupt. Downright honesty is the only rule of conduct in such a controversy, and we must follow it.

After selecting the subject of "Lay Preaching" for discussion at the next meeting, and appointing the Rev. Mr. Stebbins to open, the meeting adjourned with the doxology.

in the rooms of the Association, No. 1.288 Broadway. The attendance was so large that it was found necessary, after the reading of the Scriptures by the Rev. Mr. Fluhrer, and the dedicatory prayer by the Rev. Mr. Brookes of Philadelphia, to remove to the Church of the Divine Paternity (the Rev. J. M. Pullman, Pastor), in Thirty-fifth-st. Here addresses were made by the Rev. J. M. Pullman, President, setting forth the objects and aims of the Association, also by the Rev. Charles F. Lee, the Rev. Mr. Fluhrer, the Rev. Mr. Sweetser, the Rev. Dr. Bolles of Brooklyn, Horace Greeley, and Dr. Chapin. All testified to the great need which existed for such an Association, and prophesied great success in the future. Suggestions were made that the Association extend its privileges to young women as well as young men, and that the dues be reduced from the present rate of \$6 a year, such an amount being considered too heavy a tax to be placed upon young men starting in life. The greatest enthusiasm prevailed, and all departed with hopes of great things in the future.

The Association is not intended by any means as a rival to the Christian Association, although the exclusion of Universalists from that organization was one of the great causes leading to the formation of this. It is believed that this will be the first of a series of similar associations to be formed in all the principal cities and towns of the United States. The rooms of this, the parent organization are conveniently situated at the intersection of Broadway and Sixth-ave, are handsomely furnished, and promise to the a great attraction to the homeless young men, who come yearly to the great city. It is proposed to have a reading room open during the day and evening on week-days and during the intervalish between church services on Sundays. If the Association Fall, corner of Fourth-ave, and Twenty-third-st., the proceeds of which are to be for the benefit of the Universalist Association. Edward Egglesten of The Sunday-school Teacher made an address upon the subject of Growth and Work of the Sunday-school. He was in favor of a uniform system of leasons throughout the schools of the city; thought that the tenebers should study their scholars more than the lessens; and was opposed to keeping the churches for crown-up people and putting the children down in the basenest where religion grew musty. He thought that the Sanday-school had been heretofore neglected and nected careful attention. The speaker was followed by the Rev. J. Hyatt Smith and the Rev. De Witt Talmage. A hymn and the benediction brought the meeting to a close.

They provide that the first Mon-day in each month shall be devoted to devotional exerday in each month shall be devoted to devotional exercises and reports from churches; that on another Monday an essay, not to exceed half an hour in delivery, shall be read by some member previously appointed, and the subject be afterward discussed; that no member shall speak more than once on one subject, and not longer than 20 minutes, and that a Committee on Topics shall be elected annually at the yearly meeting. Drs. Carry, Foss, and Dunn were appointed the Committee for the current year. The Rev. Mr. Finney of Nova Sootia gave an interesting account of the progress of Wesleyan Methodism in the eastern British North American Provinces. He envied the New-York preachers their opportunities for social and spiritual development, as in his field of labor he is not privileged to meet his brethren mere than once a year in Conterence.

BASE-BALL.

ATHLETIC OF PHILADELPHIA VS. ATLANTIC OF BROOKLYN.

The first game of a regular series between these clubs was played yesterday on the Capiteline grounds, in the presence of about 1,200 people. The weather was pleasant, and bad weather was not the drawback. The time was when such a meeting between these clubs would have attracted 10,000 people to the grounds. In 1868, 12,000 persons attended one match on the same grounds between the same clubs. The game yesterday was without interest, and the general impression was that the Athletics would have no difficulty in winning a ball from their old conquerors, and the play of the first four innings proved the correctness of the public estimate. Of the good play on the Atlantic side Ferguson and Smith bore the palm. Six runs were given the Athleties by errors in the outer field and at second base. On the Athletic side Malone did excellent service behind, and Fisler's base play was first-class. In batting, Malone, Chapman, and Zettlin led the score. The full score below gives further particulars;

"WEIGHING ON THE FARM."

Toe much "guessing" is practiced in disposing of bulky farm products, whereby the buyer, but more frequently the seller, is the loser. Dealers are usually expert from long practice, and have the farmer at a disadvantage. A drover soon learns to weigh a bullock with his eye, so as to come cetthin fifty pounds of his weight every time. A Fulrhanks or other good Scale on the farm will change this, and put both parties on the same feeding. (We again the Fulrhanks and well-known called). the same footing. (We name the Fairbanks as of well-known reliability.) In addition to insuring fair dealing, such an apparatus will enable one to conduct many interesting and produble experiments in feeding stock, &c., and to accurain their comparative thrift at any time.—[American Agriculturiat.
